Autotask Workplace™: Security

46% OF BUSINESSES HAVE EXPERIENCED A DATA LEAK DUE TO A CONSUMER-GRADE FSS SOLUTION.

ITSource

Autotask Workplace™ offers you an enterprise-grade, secure File, Sync and Share platform.

Autotask Workplace delivers:

- Reliable security for critical business documents

- Access limits to protect your proprietary data

- An end to attachments,and the nightmares of version control

900 Chicago Avenue | Evanston | IL 60202

Protect your business reputation and your brand by using a professional, fully integrated FSS platform that will protect clients' and employees' data no matter what mobile device they use. Granular administrative capabilities let you grant permissions as needed, along with the reporting to keep you in the know.

No matter what happens, your documents are safely stored with access from anywhere and from any device to ensure business continuity in the event of any situation, including a disaster.

Autotask Workplace is protected by strict security certifications including HIPAA, SSAE-16 and SCO.Type II compliance with geo redundant data centers in North America, Europe, Australia and Canada.

Your content privacy and security checklist. Autotask Workplace has you covered.
